My website is up for viewing & a fun read and can be accessed at <http://www.susanaiuastro.com>

The Biorhythm program is now available. Zodiac signs who need information the most are the Cancer/Capricorn pair, and the Libra/Aries to take over what the Virgo/Pisces have been experiencing. There are major timings going on and its best to have a road map.

My business address is P.O. Box 1022 in Aiea, Hi, 96701 and that is where I can be contacted. I still have the cell: 808-489-6339 and of course this email address.

Those of you grumbling about the high cost of printer ink should know that out here in Aiea a company called Cartridge World at 99-082 Kauhale on the way down to the Post Office, that refills your cartridges for half the cost of new ones. Call them at 487-0111.

***I just found that you can get your printer ink cartridges refilled at Office Max, and they have 3 locations. Town, Stadium Mall, & Waikēle.

My mail goes to PO. Box 314 Silverdale, Washington 98383

Mon/Tues/Wed the Moon is in Aquarius so do your off the wall thing . See if you can find a Leo to hang out with.

PLANETARY MOTION DURING
Week of June 28 – July 5, 2010

I can still be reached on my Cell 489-6339 and my PO Box there is 314, Silverdale, Wa. 98383

I am ready to give my brain a bit of a rest as moving is NOT fun.

Mon: the Sun catches up to Mercury at 6 Cancer and it's time to talk about your feelings.

Midnight Venus is square and a half Jupiter 17Leo/2Aries and you'll want love and luxury in a flashy way, but immoderate social plans can be costly to romance & money.

Thurs 1st: Mercury sextiles Mars 13Cancer/Virgo and it's time to use focus, good instincts, and astute analysis to react quickly mentally and physically, but avoid defensiveness. 2:am

At 5am Mercury is half square Neptune 13Cancer/28Aquarius, precision assessment is askew, intuition is off. The facts are shady, unrealistic, deceptive, but not accurate.

Sun makes the same aspect to Neptune and Energy is retreative. You're confused about your place with family or friends. Forgiveness and understanding are needed.

At 7am, Uranus turns retrograde at 0Aries. & stays there for the rest of the month.

These comments talk about what goes on in the sky, not necessarily to you. When I talk about Mercury Retrograde in Aquarius/Capricorn-yes it involves those signs, and for anyone's chart wherever you have those signs on your wheel. So it really affects us all.

+++++

Aries/Librans: SATURN entered Libra on Oct 29th, 2009, to help them and the Arians get their arenas It turns retrograde on 1/17 marking review time.
By 4/17 it backs into Virgo to finish up its stay there, turning direct on May 24 & returning to Libra on July23, Both signs will have a taste of Uranus energy from May 27 to August 14.
JUPITER will dip its toe into Aries for 3 months to join Uranus

which arrived there earlier. Look for fireworks.
Taurus/Scorpio back to quiet

Gem/Sag. back to quiet .

Can/Cap Mercury has moved along to Cancer, light them up.

PLUTO has entered Capricorn for a 14year stay. Time to clean up business regulations, Cancers will join in..
On 4/6 Pluto backs up at 5Capricorn so you can review the the rules & regulations for the financial sector, & any area of yours that needs straightening up.

Leo/Aquarius

MARS entered Virgo on June 6, good energy for moving, my moving buddy is a Pisces and all goes into boxes.

.VENUS enters Leo on June 14 to light them up, downers for the Aquarians.

Virgo/Pisces URANUS going forward to 26 degrees, Review time for chaos. starts in mid May Brings breakups, changes, crazy water, in Hawaii as well as worldwide. Uranus goes direct on Dec 4, so time to plunge ahead with projects. Dips it's toe into Aries from 5/23 to 8/14, then returns to Pisces to finish up the Pisces stay next March 12.

SATURN. Leaves for Libra, Oct 29., & returns briefly from April17 to July 22, 2010. Finish things up.

JUPITER enters Pisces 1/17 to light them up for 2010 & it's time for Virgos to watch their finances.

Jupiter dips its toe into Aries from June to September.

MARS enters Virgo 6/6 to rev them & the Pisces up for 6 weeks.

VENUS enters Virgo on July 11, which will help me to get a house in Washington.

.ALL ABOUT TAUREANS

The second sign of the Zodiac is Fixed Earth. As I write these vignettes
I hope you see that the signs next door to each other are totally
different, and unless other planets are in both charts, they do not usually
get along.

Here we have the BULL who is stubborn and dependable and always
wants to know how much everything costs and how long it will take.
They like foods that are sweet, and may have a hidden stash of goodies
that they can rely on when having a sugar craving. Their ruling planet
is Venus and they can be kind and gentle. Just don't cross them or anger
them as they can be violent.

The sensitive part of their body is the throat—so they can orate, sing, and
have deep throaty voices. Their colors are red-orange, yellows, pinks
citron, and peach—these are the ones that show up in the Spring. Gems
are moss agate, emerald, jades, and alabaster. Blossoms are daisies,
violets, daffodils, lilies, roses, and columbines. And they tend to like
old fashioned clothes and furnishings.

Their metal is copper and sodium sulphate. Their foods are chard,
spinach, radishes, turnips that grow in the earth. Herbs are
sage, thyme, rosemary, marjoram, coltsfoot, tansy, and horseradish.

Those using their voices are Glen Campbell, Shirley Temple, Shirley
Maclaine, Barbara Streisand, Carol Burnett, Duke Ellington, Eve Arden,
Kate Smith, Glen Ford, Jack Paar, Bing Crosby, Englebert Humperdink,
Henry Fonda, Liberace. You'll see some singers and actors here.
Composers are Irving Berlin, Johannes Brahms, boxers are Sugar Ray
Robinson, & Joe Louis, chef James Beard, rulers are Queen Elizabeth,
and Adolph Hitler.

Companies are Fedders (air conditioners) American Seating, Pitney
Bowes, Holiday Inns, K Mart, Bordon, N W Airlines, Tandy & Sony.
All are interested in keeping us comfortable.

And around the world Taureans might feel comfortable in Rochester or
Buffalo, NY, Pittsburg, Pa, Maryland, Louisiana, Minnesota, Honolulu,
Japan, Equador, Israel, and Paraguay.

They get along best with other Earth sign, Capricorn & Virgo, and with
Water signs, Cancer, Scorpio, and Pisces. .

People are usually made up of several signs, the Sun usually dominant,
which keeps us from being boring, but then some like boring. Ask your
keeper of the planets how you are put together, for self understanding.

Just the facts:

It's about TIME. If you know where the planets are in your natal chart, then you can watch the current or transiting planets make aspects to yours. Each chart contains all of the signs and planets, so you may experience any of the aspects, which are:

NAME degree orb MEANING

Conjunct 0 applause--noise

Opposition 180 give & take - volleyball game

Square 90 stress, Must do

Trines 120 easy flow

Sextiles 60 opportunities

If you don't have your chart to follow, then you can be aware of Earth's planetary weather pattern in general to use as a guide.

BASICS: Our Earth rolls around the Sun in a 360 degree circle which is divided into the twelve Signs of the Zodiac, each containing 30 degrees. The Zero Aries point was arbitrarily set up to run through an English blokes

yard, it's GMT, and the time zones were created from this starting point.  
Information about the Sun Signs can be found on my website  
"<http://www.susanaiuaastro.com/>" on the Stage page (all the world's a stage  
and the Planets are the players)

#### PLANET MEANING SCHEDULE

#### SPEEDERS:

SUN ego These three move together

MERCURY mind & VENUS feelings around the Zodiac yearly

MOON emotions Circles Earth each 28 days, New/Full

#### TIME TRANSITING IN EACH SIGN TOTAL YEARS

MARS energy 6 weeks 2 years

#### SLOWMOVERS:

JUPITER expansion 1 year 12 years

SATURN limitation 2 ½ 1/2years 28 years

URANUS freedom 7 years 84 years

NEPTUNE intuition 14 years 167 years

PLUTO power 14 years 250 years

All except the Sun and Moon appear to back up or retrograde on a schedule  
and we get to review whatever the planet represents.

This ebb and flow of timings lets us all take turns. We have no control over  
time, but we should have control over how we react to the patterns. The path  
of the planets gives us an indication of how fast or slow we should run our  
lives. (It's not wise to turn your back on Mars.) Let the planets guide you  
through life safely and productively and allow for some fun along the way.
